Cisco Business Switches

With the ever-evolving business environment—from changes in consumer behavior to digitization—small businesses expect a fundamental shift in how they conduct their business. This means acceleration of digital transformation. It also means making sure that employees have fast, reliable access to critical business applications. The importance of maintaining a reliable network to accelerate digital transformation and business continuity is now more important than ever.

The Cisco® Business Switches family is a portfolio of affordable switches ideal for deployments in small offices, retail, and workgroup environments. Zero touch deployment simplifies and expedites network setup. Advanced routing optimizes network bandwidth to accelerate digital transformation. Enhanced security protects business- critical information and continuity.

Cisco Business Switches can be easily managed by Cisco Business Dashboard, a centralized network management tool for Cisco Business families of switches, routers, and wireless access points. Cisco Business Dashboard simplifies traditional challenges in managing a business network while automating the deployment, monitoring, and lifecycle management of networking devices. Cisco Business Switches can also be set up and managed by Cisco Business mobile app.

Cisco Business Switches deliver a simple, secure, and cost-effective solution that provides a reliable foundation for any small business network.

Benefits

Simple – Intuitive Cisco Business Dashboard and mobile app simplifies network operations and automates lifecycle management.

Flexible – Extensive portfolio provides ultimate flexibility from 5 to 48 ports and Power over Ethernet (PoE+) combinations. Flexible pricing models that complement every stage of business growth.

Secure – Prevent network breaches and segment traffic according to business needs with more advanced security features.

The Cisco Business Switch family is available in four series, offering a combination of from 5 to 48 10/100/1000BASE-T ports.

Cisco Business 350 Series Managed Switches	Cisco Business 250 Series Switches	Cisco Business 220 Series Switches	Cisco Business 110 Series Unmanaged Switches
			
The Cisco Business 350 Series Managed Switches are reliable building blocks for the small business network. With an intuitive dashboard, advanced features, and pervasive security, the Cisco Business 350 Series Managed Switches are positioned to accelerate your digital transformation.	The Cisco Business 250 Series is the next generation of affordable switches that combine powerful network performance, security, and reliability with a comprehensive suite of network features you need for a solid small business network.	The Cisco Business 220 Series are affordable switches with ease of use, security, and reliability for business-class networks. These switches bridge the gap between the affordability of an unmanaged device and the ease-of-use of switches.	The Cisco Business 110 Series Unmanaged Switches are affordable, plug-and-play entry-level switches that provide gigabit Ethernet switching with key features like Power over Ethernet (PoE), energy efficiency, and traffic privatization for a fast and resilient small business network.

Cisco Business Support Service

Cisco Business Switches offer the reliable performance and peace of mind you expect from a Cisco solution. A proven solution that has been rigorously tested to help ensure optimal network uptime for business continuity. Complementary one-year access to our Small Business Support Center for ongoing support. Limited lifetime (Cisco Business 350, 250 and 110 series switches) or 3-year warranty (Cisco Business 220 series switches) keep your business running smoothly.

Innovative design

Elegant and compact design, ideal for installation outside of wiring closet such as retail stores, open plan offices, and classrooms.

High performance

1GbE, multi-gigabit and 10GbE options and wire-speed performance provide critical building blocks for any small business network.

Flexibility

Extensive portfolio providing ultimate flexibility from 5 to 48 ports and PoE+ combinations.

Ease of management

With True Stacking technology up to four interconnected Cisco Business Switches operate as a single device with unified management control, thereby simplifying management and reducing operational expenses.

Security

Enhanced security capabilities provide a solid foundation to safeguard the privacy of your customers.

Always-On Reliability

Proven technology from the company known for network innovation to ensure business continuity.
