Feature deprecation notice for Catalyst Center

Cisco deprecates features to maintain software security, performance, and reliability. By phasing out legacy components, we reduce technical risk and focus our resources on modern innovations. This process ensures a more stable, streamlined, and high-performing experience for our users. Customer systems information associated with deprecated features, packages, and capabilities will be deleted in accordance with the retention schedules outlined in the Catalyst Center Offer Disclosure.

This document describes the notices and upcoming deprecated features in Catalyst Center. For any questions or concerns, reach out to your account team.

Table 1. Change history to this document since its initial release

Date	Change
2026-9-10	Updated additional information and added release to be deprecated.
2026-07-07	Updated table titles and additional information.
2026-05-05	Added feature deprecations for Catalyst Center 3.2.2.
2026-04-16	Added upcoming deprecation for Tableau Data Extract.
2026-04-09	Initial publication.

Announcements

Feature deprecation announcements in 3.2.2

Notice type	Feature	Additional information / Alternatives	Release to be Deprecated
Upcoming deprecation	Endpoint Analytics security sensor	Entire application/package to be deprecated. No alternative is available.	3.5.1
Upcoming deprecation	Cisco Wide Area Bonjour application with Catalyst Center	Entire application/package to be deprecated. No alternative is available.	3.5.1
Upcoming deprecation	Stealthwatch Security Analytics service	Entire application/package to be deprecated. No alternative is available.	3.5.1
Upcoming deprecation	Routing Profile and Provisioning	Configuration of WAN links removed from workflow. An alternative solution is to use Templates to configure.	3.5.1
Upcoming deprecation	Firewall Profile and Provisioning	ASA and FMC FTD are being removed. An alternative for ASA configuration via Network Profile is through Template Hub. FMC FTD does not have an alternative solution.	3.5.1

Notice type	Feature	Additional information / Alternatives
Deprecated	Cisco User-Defined Network	Cisco User Defined Network Plus replaces UDN for Catalyst Center as the supported UDN solution. As part of this change, these GUI workflows are no longer supported: • Provision > Service Catalog > Cisco User Defined Network • Provision > Cisco User Defined Network • Workflow > Configure Cisco UDN
Deprecated	Learn Device Configuration workflow	Catalyst Center doesn't support the Learn Device Configuration workflow. To manage Cisco Catalyst 9800 Series Wireless Controllers with existing configurations, an alternative solution can use the Per-Device Configuration feature.

Feature deprecation announcements in 2.3.7.10

Notice type	Feature	Additional information / Alternatives
Deprecated	Cisco User-Defined Network	Cisco User Defined Network Plus replaces UDN for Catalyst Center as the supported UDN solution. As part of this change, these GUI workflows are no longer supported: • Provision > Service Catalog > Cisco User Defined Network • Provision > Cisco User Defined Network • Workflow > Configure Cisco UDN

Feature deprecation announcements in 2.3.7.5

Notice type	Feature	Additional information / Alternatives
Deprecated	vManage	Catalyst Center no longer integrates with vManage.
