Power Cable Specifications

This appendix provides supported power cable specifications.

Supported Power Cables and Plugs

Each power supply has a separate power cable. Standard power cables or jumper power cables are available for connection to the server. The jumper power cables, for use in racks, are available as an optional alternative to the standard power cables.

Note Only the approved power cables or jumper power cables provided with the server are supported.

Table B-1 lists the power cables for the server power supplies.
